Drugs are any substances that can change the way your body or mind works. This includes alcohol, tobacco, marijuana, and prescription drugs. Some drugs are legal, while others are illegal. But no matter what their legal status, all drugs have the potential to be harmful.

Drug abuse is the use of drugs in a way that is harmful to your health or your life. This can include using drugs without a prescription, using drugs in large doses, or using drugs in a way that is illegal.

Drug addiction is a chronic disease that affects the brain and behavior. People who are addicted to drugs cannot control their drug use, even if they want to. Addiction can lead to serious health problems, financial problems, and relationship problems.
