The Genesis of Cubism: A Catalyst for Artistic Revolution

The year 1907 marked a pivotal moment in the art world as Pablo Picasso, alongside Georges Braque, unveiled *Les Femmes d'Alger (O.J.)*. This enigmatic masterpiece shattered conventional artistic norms and laid the

foundation for Cubism. Inspired by African masks and Iberian sculpture, Picasso deconstructed and fragmented the human form, introducing multiple perspectives and geometric shapes.

They muted colors and eliminated depth, creating abstract compositions that challenged traditional depictions of space and perspective. Synthetic Cubism: A New Language of Collage

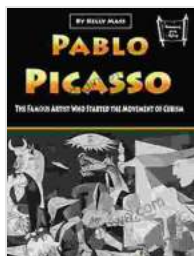

As Cubism evolved, Picasso and Braque ventured into the realm of collage and papier-collé, incorporating fragments of newspapers, wallpaper, and other materials into their compositions. This technique, known as Synthetic Cubism, further pushed the boundaries of artistic representation and opened up new avenues for experimentation.
